

Holistic Training in Managing Deterioration: RESTORE2mini, ReSPECT and Routes for Escalation

A Free Project ECHO® Training Programme

Care home staff are experts about their residents and can be first to notice when something is wrong. This training builds on your expertise to help you manage a deteriorating resident confidently and with a person-centred approach.

1. **RESTORE2mini** is an approach to identifying 'soft signs' of deterioration and escalating concerns to other care professionals using the SBARD structured communication tool.
2. **ReSPECT** stands for Recommended Summary Plan for Emergency Care and Treatment. The ReSPECT process creates personalised recommendations for a person's clinical care in emergency situations when they may not be able to make decisions or express their wishes.
3. **Routes for Escalation** can be difficult to navigate, particularly those new to the care sector. With up-to-date guidance from Yorkshire Ambulance Service, this topic aims to improve understanding of the local routes for escalation and confidence using them.

86% of participants agreed that the training was relevant to their role and provided learning they can use in their practice

Programme Schedule

Session	Next Training Dates	Future Training Dates
RESTORE2mini	Thursday, 21 September	16 Nov 25 Jan (2024)
ReSPECT	Thursday, 28 September	23 Nov 01 Feb
Routes for Escalation	Thursday, 05 October	30 Nov 08 Feb

All sessions run from 2:00 - 3:30PM and will be held via Zoom.
Attendees will receive a certificate upon completion of all three sessions.

To be notified when these dates are available to book, please email freddie.cheal@nhs.net

This programme is for **all care home staff**, including managers.

To register, scan the QR code opposite with a smartphone camera.
